Dakota County EOP Summary

The Dakota County Emergency Operations Plan (EOP) is developed and updated in accordance with existing federal, state and local statues and understandings of various departments and agencies involved. The plan has been reviewed by the Minnesota Department of Public Safety, Division of Homeland Security and Emergency Management.

Plan introduction

The plan introduction provides a context for the Dakota County EOP, including the reason, purpose, and assumptions for preparing this plan.

Concept of Operations

Concept of Operations describes the process by which this operations plan will be executed, and how the application of the Incident Command System (ICS) guides coordination. Emergency Responsibilities are assigned to various county departments and are listed under the Emergency Support Functions (ESF) they are responsible for.

Coordination, Direction and Control

Coordination, Direction and Control describes how the direction and control of government operations is achieved from an equipped and organized facility designed to conduct emergency operations. The primary Emergency Operations Center (EOC) is in the Dakota County Judicial Center in Hastings.

The Dakota County Board of Commissioners will be responsible for making policy decisions on behalf of the County during an emergency or disaster.

The County Manager is responsible for the overall direction and control of County resources in response to a large-scale incident or disaster.

The Dakota County Emergency Management Director is responsible to implement the County Emergency Operations Plan (EOP) and will serve in an advisory role in policymaking regarding response, resources, and operating guidelines.

Emergency Support Functions (ESF)

The Dakota County Emergency Management Director, through the plan, designates the primary agencies for each Emergency Support Function (ESF) to coordinate the activities of that function. These functions are summarized in the table below:

| ESF | ESF # | Description | Responsible Entity (P)rimary (S)upport (C)oordination |
|----------------|----------|--|---|
| Transportation | ESF 1 | Responsible for County transportation support to governments and county agencies, restoration and recovery of transportation infrastructure, movement restrictions, damage and impact assessment to the transportation system, performance of and assisting with evacuation and re-entry planning, processing of all transportation assistance requests and tasks received in the EOC, prioritizing transportation resources for the transportation of people, materials, and services, and performing all necessary actions to assist with recovery operations. | P - Transportation Dept. S - Transportation providers (MVTA, etc.) C - Dakota County Transportation |

| a) Public Safety Communications b) Telecommunications (computer and telephone systems) support to disaster personnel. Activation of warning systems and restoration of essential communications systems are coordinated by ESF 2. Public Works and Engineering Besponsible for providing technical advice and evaluations, engineering systems, construction management and inspection, emergency contacting, emergency repair of wastewater and solid waste facilities, removal and handling of debris, and the opening and maintaining of roadways. Fireflighting ESF Responsible for fireflighting activities and evaluation in formation to facilitate emergency expair of each environment. Emergency Management Emergency Management Est Responsible for coordinating efforts for natural and technological disasters. Includes growth and temporary housing. Responsible for providing technical advice and heading of debris, and the opening and maintaining of roadways. Fireflighting ESF Responsible for irreflighting activities and wild land settings and the interface between each environment. Emergency Management Emergency Management Emergency Management Est Responsible for coordination of incident management efforts, incident action planning, collecting, processing, and disserminating information to facilitate emergency response and recovery efforts. Preparation of special operations plans and damage and needs assessments are handled by ESF # 5. Est Responsible for coordinating efforts for fautural and technological disasters. Includes floating emergency response efforts for natural and technological disasters. Includes facility space, office equipment and supplies, contracting and purchasing, etc. P - Dakota County Social Services S - Employment and Economic Assistance P - Dakota County Social Services S - Depublic Health and medical care needs prior to, during and following a disaster.
